## Motor Vehicle Accident Injuries

Scott Anderson & Associates Physiotherapy in Regina is accredited to see clients with injuries sustained in motor vehicle accidents.

With more than 30 years of experience as a physiotherapist, Scott has treated Saskatchewan Government Insurance (SGI) clients at all levels, from assessment team reviews to secondary level treatment. At this time, our clinic sees primary level SGI clients.

From head injuries to whiplash to musculoskeletal issues, we will work with your physician, insurance provider and other team members to assist in your recovery following a motor vehicle accident.

Our goal is to accurately assess your injuries and discuss and prescribe a course of physiotherapy for you that will help you recover as quickly and as thoroughly as possible.
