

Our Services

Post-Surgical Rehabilitation

Research has shown that having physiotherapy following surgery such as joint replacements will speed up healing and lead to a more complete recovery.

We are knowledgeable about joint replacement surgery and other surgeries and will work with your surgeon and physician as a team to determine the most effective therapy for you.

Our goal is to help you increase strength, activity, and range of motion so that you can return to your normal level of activity as quickly as possible without recurring problems.
